job Title

I am Abdalrhman Reda Mohamed, a Computer Science graduate from Assiut University with over 1.5 years of hands-on experience in Flutter app development. My work spans both local and international projects, including through the freelance platform "Mostaql" and direct client collaborations. I have successfully delivered a range of applications, leveraging Flutter's widget-based framework and the Dart language to create engaging digital experiences. Additionally, I have taught programming basics to children on the iSchool platform, nurturing their technical skills and passion for technology

Education

2020 – 2024/06
Assuit, Egypt

Easy Parking ⧉
https://github.com/abdalrhmanreda/easy_parking_app
A parking system is a smart solution for efficiently managing vehicle parking spaces. Utilizing technology, it streamlines parking operations, offering features such as automated payment, real-time availability tracking, and reservation options. This system enhances user experience, reduces congestion, and promotes better utilization of parking resources, contributing to a more organized and convenient urban environment.

Sneakers ⧉
https://github.com/abdalrhmanreda/nike-app
The Sneakers App System is a mobile application designed for users to explore, purchase, and stay updated on the latest sneaker releases. Offering an intuitive interface, it allows users to browse a diverse collection of sneakers, view detailed product information, and securely make purchases. The app also provides real-time notifications on upcoming releases and exclusive promotions, creating a seamless and engaging experience for sneaker enthusiasts

Food Recipe App
https://github.com/abdalrhmanreda/food-recipe-app
Food Recipe is a mobile application designed to provide users with a seamless experience in discovering, exploring and saving delicious recipes. Whether you are a cooking enthusiast or someone looking for quick and easy meal ideas, this app has you covered.

Quranic ⧉
https://github.com/abdalrhmanreda/quranic_app
The "Quranic" app is a valuable tool for Muslims, offering features like prayer times based on location, access to the Holy Quran and Hadiths, and various supplications. It also includes multiple Quran interpretations, making it a comprehensive religious resource.

E-book ⧉
https://github.com/abdalrhmanreda/e-book
The e-book app provides a vast library of digital books across various genres, allowing users to read on-the-go. It features customizable reading settings and offline access. Discover and enjoy your favorite books anytime, anywhere

Movie app ⧉
https://github.com/abdalrhmanreda/movie_app
Movie App allows users to search for and watch movies, with the ability to add movies to the favorites list. Users can register, search using multiple criteria, and see movie descriptions and ratings. The application provides a wide range of films, including new, classic, documentaries, and family films.

Shopping Mate ⧉
